

Deficiency Progress Report

To complete the evaluation process, Cal/EPA requires the CUPAs to submit Deficiency Progress Reports that explain the CUPA's progress towards correcting the identified deficiencies. Deficiency Progress Reports are due every 90 days after the evaluation date until all deficiencies have been corrected.

CUPA: Colusa County Environmental Health Division
Evaluation Date: July 25, 2007 and August 7, 2007
Evaluators: JoAnn Jaschke, CalEPA
Mickey Pierce, DTSC
Jack Harrah, OES
Francis Mateo, OSFM

Date Update 1 submitted: November 16, 2007

Date Update 2 submitted: February 14, 2008

Deficiency corrected with update 2: Deficiency 6

Date Update 3 submitted: May 12, 2008

Remaining Deficiencies

Deficiency 1: The CUPA is not collecting enough fees from the regulated businesses to cover their expenses.

Preliminary Corrective Action(s): By November 5, 2007, the CUPA will review their fees to ensure the fee structure covers their expenses to achieve a stable program. By February 4, 2008, the CUPA shall explain how the CUPA will move their revised fee structure through the normal budgeting process in order to obtain the necessary approvals from the CUPA's governing body. By July 1, 2008, the CUPA will provide Cal/EPA with a copy of their FY 08/09 fee schedule.

CUPA Corrective Action, (Update 1): Colusa County Environmental Health and the Fiscal Department of Health and Human Services recently reviewed the most current fees (10/31/07). The new fees will reflect actual hours from Environmental Health's "Time Studies". We still need to have the new fees approved by the Board of Supervisors. An anticipated time frame would be by July 1, 2008.

Cal/EPA Response, (Update 1): Cal/EPA accepts the progress Colusa County is making towards correcting this deficiency. Cal/EPA will continue to track the progress being made to correct this deficiency via the deficiency progress reports. The next report is due February 14, 2008.

CUPA Corrective Action, (Update 2): Colusa County Department of Health and Human Services is planning to take our proposed fee schedule to the Board of Supervisors in the month of April, 2008. If all goes as planned, we would be able to implement our fees in the July billing.

Cal/EPA Response, (Update 2): Cal/EPA accepts the progress Colusa County is making towards correcting this deficiency. Cal/EPA feels the CUPA is on there way towards meeting the July 1, 2008, deadline for achieving a stable program with the proposed fee schedule. Continue to update Cal/EPA on the progress via deficiency progress reports.

CUPA Corrective Action, (Update 3): Colusa County Department of Health & Human Service went to the Board of Supervisors (BOS) on April 29, 2008 to have the Environmental Health fees adjusted. The BOS passed and adopted the new fee schedule on that same date. The new fees will be effective July 1, 2008.

Cal/EPA Response, (Update 3): Cal/EPA is pleased to learn the BOS passed and adopted new fees. In the next deficiency progress report, provide Cal/EPA with a copy of the new fee schedule.

Deficiency 2: The CUPA is not citing violations in a manner consistent with the definition of Minor, Class II, and Class I as provided in statute and regulations.

Preliminary Corrective Action(s): Immediately, the CUPA shall begin properly classifying violations and taking formal enforcement against businesses as necessary. By November 5, 2007, the CUPA will begin taking formal enforcement against ABA Energy and Vintage Production California LLC. After November 5, 2007, the CUPA will provide Cal/EPA and DTSC with updates every 90 days on their progress towards achieving final settlement with ABA Energy and Vintage Production California LLC.

CUPA Corrective Action, (Update 1): Colusa County Environmental Health has had clarification on citing violations. Our inspections have become more efficient in regards to identifying violations and classifying them correctly as well. We have not been able to proceed any farther with enforcement of ABA Energy and Vintage Production. Staffing issues are still paramount within our department. Until we can become fully staffed, we will be in survival mode.

Cal/EPA and DTSC Response (Update 1): Cal/EPA and DTSC feel the action taken by Colusa County to properly classify violations sufficiently addresses this part of the deficiency. However; Cal/EPA and DTSC do not feel that Colusa County is adequately addressing the second part of this deficiency that requires Colusa County to take formal enforcement against ABA Energy and Vintage Production. Formal enforcement options include

issuing the facility an Administrative Enforcement Order or referring the case to Colusa County's prosecuting agency, a state agency, or the U.S. EPA. Please feel free to contact Cal/EPA for assistance in developing the AEO action or for referral assistance.

CUPA Corrective Action, (Update 2): Colusa County has recently attended the 2008 CUPA conference. The Director of Health and Human Services as well as the Director of Environmental Health attended the enforcement track. This was done to obtain the information from our peers, so that we can follow suit. On 2/8/08 a discussion regarding the AEO process occurred with our Board of Supervisors Liaison & on 2/11/08 the same discussion occurred with County Counsel.

Cal/EPA and DTSC Response (Update 2): It is encouraging that the Directors attended the enforcement track of the 2008 CUPA conference. Cal/EPA and DTSC would like to know how this information will be disseminated to the CUPA staff that perform the inspections and assist with the formal enforcement. Please provide an update on the specific steps you are taking to put in place a formal enforcement process and how you plan to apply this process to ABA Energy and Vintage Production cases. The next progress report is due May 5, 2008.

CUPA Corrective Action, (Update 3): The Colusa County Environmental Health Director and Colusa County Director of Health & Human Services attended the enforcement track at the CUPA Conference in February. CCEHD is currently submitting its first AEO to County Counsel for review. We anticipate that the AEO will be issued by June 15th, 2008. All fines have been set with accordance to State penalties.

Cal/EPA and DTSC Response (Update 3): Update 3 partially addressed our comments to Update 2. We still need information on how 1) the CUPA conference enforcement track training will be disseminated to the CUPA staff that perform the inspections and assist with the formal enforcement, and 2) how you plan to apply the enforcement process you have begun to put in place to the ABA Energy and Vintage Production cases.

Deficiency 3: The CUPA has not documented how it expends at least 5% of its hazardous waste related resources to the oversight of universal waste handlers and silver only generators in their Inspection and Enforcement Plan.

Preliminary Corrective Action(s): By January 25, 2008, the CUPA shall document how it expends at least 5% of its hazardous waste related resources to the oversight of Universal Waste handlers.

CUPA Corrective Action, (Update 1): Colusa County will respond by January 25, 2008 on how it allocates at least 5% of hazardous waste resource time.

Cal/EPA and DTSC Response (Update 1): Cal/EPA and DTSC accept the progress Colusa County is making towards correcting this deficiency. Cal/EPA and DTSC will continue to track the progress being made to correct this deficiency via the deficiency progress reports. The next report is due February 14, 2008.

CUPA Corrective Action, (Update 2): Colusa County Environmental Health as of 2/14/08 is almost fully-staffed. We are currently setting up interviews for the vacant Environmental Health Aide position. Now that we have two full time Environmental Health Inspectors, we will be able to devote the majority of one of our positions to the CUPA Program. By June 30th, 2008, I project that we will meet the 5% DTSC required time.

Cal/EPA and DTSC Response (Update 2): Cal/EPA and DTSC accept the progress Colusa County is making towards correcting this deficiency. Cal/EPA and DTSC will continue to track the progress being made to correct this deficiency via the deficiency progress reports. Please keep in mind that the 5% resource time is for the oversight of universal waste handlers and silver only generators and can include training, information dissemination, inspections, and other mechanisms mentioned on page 2 of the May 8, 2001 CalCUPA Forum memo located at: <http://www.calcupa.net/programs/hazwaste/cesgissue.pdf>. The next report is due May 5, 2008.

CUPA Corrective Action, (Update 3): Colusa County Environmental Health is fully staffed at this time. We currently have two overall inspectors, one Environmental Health Aide and one working director. Our plan is to reclassify the EH Aide position into an REHS. This will in turn allow our department to devote one full-time employee to the CUPA program.

Cal/EPA and DTSC Response (Update 3): This deficiency remains outstanding. We look forward to receiving information on the CUPA's statement in Update 2 that says "By June 30th, 2008, I project that we will meet the 5% DTSC required time."

Deficiency 4: The CUPA did not have a CalARP dispute resolution procedure.

Preliminary Corrective Action(s): By October 25, 2007, the CUPA must develop and adopt a CalARP dispute resolution procedure that addresses all of the elements of T19 CCR 2780.1.

CUPA Corrective Action, (Update 1): Colusa County is currently working on a dispute resolution procedure. The aforementioned document will be complete by December 31, 2007 and forwarded to the State for review.

Cal/EPA and OES Response (Update 1): Cal/EPA and OES accept the progress Colusa County is making towards correcting this deficiency. Cal/EPA and OES will continue to track the progress being made to correct this deficiency via the deficiency progress reports. The next report is due February 14, 2008.

CUPA Corrective Action, (Update 2): The dispute resolution is still under review. Colusa County Environmental Health should have a finished product by June 30th, 2008.

Cal/EPA and OES Response (Update 2): Cal/EPA and OES accept the progress Colusa County is making towards correcting this deficiency and approve the revised timeline finalizing the CalARP dispute resolution by June 30, 2008. Cal/EPA and OES will continue to track the progress being made to correct this deficiency via the deficiency progress reports. The next report is due May 5, 2008.

CUPA Corrective Action, (Update 3): The dispute resolution will be in place by the aforementioned time line of June 30, 2008.

OES Response, (Update 3): Please forward a copy of the finalized dispute resolution to CalEPA and to OES when available. If not finalized by the target date, please update your progress on the next quarterly report.

Deficiency 5: The CUPA has not met the required inspection frequency for business plan facilities.

Preliminary Corrective Action(s): By July 25, 2008, the CUPA must have a plan in place to ensure that each facility will be inspected at least every three years. This should include staffing issues and training.

CUPA Corrective Action, (Update 1): The most recent CUPA audit indicated that there should be at least two full-time employees devoting their time solely on the CUPA Program. Currently, there is a working director and one Environmental Health Trainee. These two positions are required to implement and inspect all of the other areas of the environmental health programs (solid waste, food, liquid waste, housing, land use, institutions, occupational health, childhood lead, recreational health, smoking control, vector control, medical waste, water, and respond to hazardous materials incidents). Because of this shortage, we are struggling to meet the demands of the Public and State. In an effort to combat these issues, Colusa County

has hired an independent consultant to evaluate our most current salaries. This evaluation will possibly raise our low salaries. Hopefully by raising our salaries, we will be able to attract applicants. Until then, I anticipate the CUPA will continue to struggle.

Cal/EPA and OES Response, (Update 1): Cal/EPA and OES accept the steps Colusa County is making towards hiring additional staff in order to correct this deficiency. Cal/EPA and OES will continue to track the progress being made to hire and train the additional staff in order to meet the required inspection frequency for business plan facilities via the deficiency progress reports. The next report is due February 14, 2008.

CUPA Corrective Action, (Update 2):

Cal/EPA and OES Response, (Update 2): In the next deficiency progress report due May 5, 2008, provide Cal/EPA with an update on the efforts to hire and train additional staff in order to meet the required inspection frequency for business plan facilities.

CUPA Corrective Action, (Update 3): Currently, the structure of our office only allows 85 % of a full-time employee to work in the CUPA Program. However, as mentioned earlier our office is planning on embarking on an employee reclassification. This will enable us to devote at least one full-time employee to the CUPA Program.

OES Response, (Update 3): With the next scheduled quarterly report, please outline the plan specified in the preliminary corrective action that ensures the inspection frequency is met and maintained.

Deficiency 7: The CUPA is neither regulating farms under the business plan program, nor properly exempting them from the provisions of the business plan program.

Preliminary Corrective Action(s): By July 25, 2008, the CUPA must develop an action plan to either regulate agricultural handlers under the business plan program, or to properly apply one or more of the available exemptions.

CUPA Corrective Action, (Update 1): Colusa County Environmental Health is currently trying to locate the local ordinance/policy that the County was using to exempt farms from the CUPA Program. Also, we would like for the State OES to provide training and meet with our Board of Supervisors, so that they could educate us on all the regulations that we need to follow.

Cal/EPA and OES Response, (Update 1): Cal/EPA and OES accept the progress Colusa County is making towards correcting this deficiency. OES can provide Colusa County, including the Board of Supervisors, with training

on the business plan program, specifically with regard to agricultural handlers. In the next progress report, provide OES a copy of the local ordinance/policy that the County was using to exempt farms.

CUPA Corrective Action, (Update 2): Colusa County Environmental Health is attempting to find that provision. We have a request to the former PA who was regulating the HMBP's. If we can't locate ordinances/policies by 3/1/08. We will re-examine the farm exemption.

Cal/EPA and OES Response, (Update 2): Cal/EPA and OES accept the progress Colusa County is making towards correcting this deficiency. Cal/EPA and OES feel the CUPA is on there way towards meeting the July 25, 2008, to develop an action plan to either regulate agricultural handlers under the business plan program, or to properly apply one or more of the available exemptions. Continue to update Cal/EPA and OES on the progress via deficiency progress reports.

CUPA Corrective Action, (Update 3): Colusa County Environmental Health could not locate any ordinances which would exempt farmers from the CUPA Program. We would like the State OES to make a presentation to the BOS/Farm Bureau. This training will help educate the public and staff about each or our roles in the CUPA Program.

OES Response, (Update 3): To arrange for an OES presentation to your governing Board or any other group, please call Brian Abeel at (916) 845-8768 or Jack Harrah at (916)845-8759.
